Profile

OKR, SAFe, Agile, Databases (MySQL, SQL Server, MongoDB), DevOps, Design, Project Management, Development (Laravel, CakePHP, Kohana, Wordpress), Lean, PHP, JS (Node, JQuery, VueJS, React), HTML, CSS (Bootstrap, Material UI)
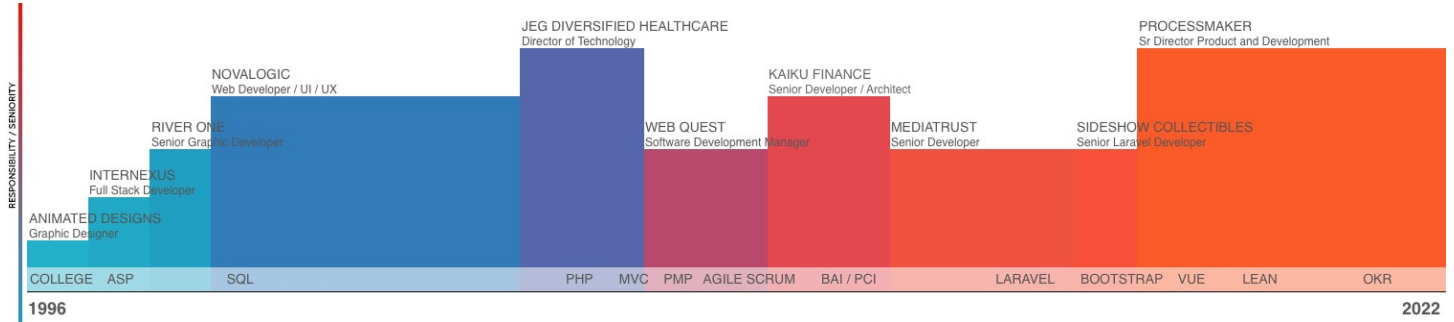

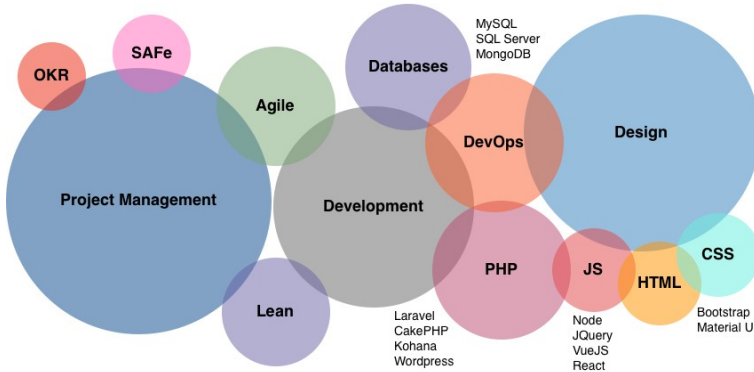

Respectful collaboration is the single greatest factor in a team's success

For the last 25 years I've worked on the full stack of web development and the entire lifecycle of a product from its inception through the engineering, documentation and training. As a "hands on" leader, I am always working on building and optimizing agile teams, focusing on three things: balance, handling failures, and opening up communications for continuous improvement.

Work Experience

Senior Director of Product and Engineering

ProcessMaker.com - Jan 2018 - Feb 2022

I was responsible for product planning and execution throughout the lifecycle of ProcessMaker 4. I focused on user insights across the entire customer journey, surfacing any unmet needs, indicators of risk, and opportunities for expansion. I hired and developed a great Agile team to execute on the company's next-gen Enterprise SAAS low-code workflow solution.

Senior Laravel Developer

Sideshow Collectibles , Inc. - Jan 2016 - Jan 2017

As a Senior Laravel Developer, I worked to modernize and upgrade an existing system using industry standard with Laravel PHP. I identified database issues and drastically reduced database load by creating and implementing a new caching mechanism. In addition, I unified a number of tools and created a new report for sales and leads used by the buyers, the sales team and marketing teams with on demand reporting on multiple campaigns, sales and forecasts into product performance.

Director of Software Development

Kaiku Finance , LLC - Jan 2013 - Dec 2015

I reorganized development using Agile Methodologies to give the business better visibly into the development process so that development could be scheduled and planned accordingly. I reviewed the current offering and worked hands on with the team to implement sweeping changes to modernize and standardize their code base for both mobile and desktop. Worked with Identity APIs, Fraud APIs and FIS APIs, KohanaPHP framework and MySQL.

Alan Bollinger (702) 918-6767 | ajb@wow.com | Portfolio: http://ajb.bz/projects

Engineering Manager / Senior Developer

Web Quest , Inc - Jan 2011 - Jan 2013

I evaluated multiple third party code bases from previous contractors, hired developers and implemented key changes for security, maintainability and scalability. I proposed and implemented a new platform for secure video streaming. I planned, designed, built, launched and then hired the maintenance team for the site that saw 50,000,000+ unique visitors a month.

Director of Technology

JEG Diversified Healthcare , Inc.- Jan 2004 - Jan 2009

As director of technology, I was responsible for monitoring the operations in the technical side of an organization and managing the efficiency of network systems to ensure the stability and efficiency of business functions. I also performed regular quality checks on the systems, improving users' interface, and upgrading network infrastructure to achieve the highest customer satisfaction.

Senior Developer e - Commerce | Community Product Manager

Novalogic , Inc. - Jan 1999 - Jan 2004

As the Senior Developer and Community manager, I wore many hats at Novalogic. I designed and developed a custom ecommerce solution for their full video game backlog, designed and developed a custom community application for users to talk, track statistics and see their standings from multiplayer games. In addition, I also contributed to the games themselves, offering designs for the menus and in-game interfaces.

Prior Experience

2010-12 Media Trust, Inc. - Full Stack PHP Developer + Affiliate and E commerce.
2006-10 SynergyMX, Inc. - Full Stack Consultant

Testimonials and References

"Alan is a very talented Web Developer with strong technical skills. He has good business sense and the ability to complete projects on his own without supervision. He went above and beyond what was required of him to complete projects on time at MediaTrust."
Joe Hopkins, Chief Systems Architect, MediaTrust, Inc.

"Alan is an extremely capable IT person who understands how e-marketing can be used effectively to enhance productivity and improve the bottom line. He also shows great initiative in developing new and creative uses of services his team provides."
Rich Jarc, VP Marketing, JEG Diversified Healthcare

"Alan is detail oriented, setting clear goals and objections that help ensure projects are successfully managed. His lively personality is enjoyable to work with."
David R. Smith, VP Marketing - Kaiku Finance

"Over the past two years, Alan helped our company rebuild and relaunch a fast well designed and useful website. He is an expert! I would highly recommend him for any web project."
Avi Gallant, Founder and Partner of TheUntz.com

"Alan is an innovative thinker and detailed oriented. His project management skills were exceptional and he would be an asset to any team."
Adrienne Gray, Vice President, Kaiku Finance

"Alan is a high level PHP developer with a wealth of experience and knowledge when it comes to coding PHP sites and applications. He is a great asset or leader to any team."
Javier Hernandez, DevOps Manager, MediaTrust, Inc.
